

## Indexing Databases

Atlantis Press has affiliations with the following indexing databases:

### Web of Science

*Trust the difference*

#### Web of Science

Clarivate Analytics' *Web of Science* is an online subscription-based citation indexing service which gives access to multiple databases that reference cross-disciplinary research and which allows for comprehensive citation search and in-depth exploration of specialized sub-fields within a scientific discipline. It consists of 6 core databases, a number of specialist collections, as well as regional databases and currently contains more than 160 million records and over 1.7 billion cited references. A select number of Atlantis Press journals and proceedings is indexed in Web of Science databases such as the *Science Citation Index Expanded (SCIE)*, the *Emerging Sources Citation Index (ESCI)* and the *Conference Proceedings Citation Index (CPCI)*.

### Scopus

#### Scopus

Elsevier's *Scopus* is the world's largest abstract and citation database of peer-reviewed scientific journals, books and conference proceedings which covers research topics across all scientific, technical and medical disciplines. The database currently contains more than 75 million records and over 1.4 billion cited references, while it also offers various smart tools and metrics to track, analyze and visualize research. At present a select number of Atlantis Press journals and proceedings is indexed in Scopus and a number of applications are in progress.

(RESEARCH) INSTITUTIONS

### MEDLINE

#### MEDLINE

*MEDLINE* is the **U.S. National Library of Medicine** premier bibliographic database that contains more than 25 million references to journal articles in life sciences with a concentration on biomedicine. The subject scope of MEDLINE is biomedicine and health, broadly defined to encompass those areas of the life sciences, behavioral sciences, chemical sciences and bioengineering needed by health professionals and others engaged in basic research and clinical care, public health, health policy development or related educational activities. MEDLINE also covers life sciences vital to biomedical practitioners, researchers and educators, including aspects of biology, environmental science, marine biology, plant and animal science as well as biophysics and chemistry. A select number of Atlantis Press journals in health and medical sciences is indexed in MEDLINE.

### Directory of Open Access Journals (DOAJ)

The *Directory of Open Access Journals* (DOAJ) is a community-curated online directory of open access journals which aims to be the starting point of all information searches for quality, peer-reviewed, open access material. DOAJ's mission is to increase the visibility, accessibility, reputation, usage and impact of quality, peer-reviewed, open access scholarly research journals globally, regardless of discipline, geography or language. At present, the directory contains more than 14,000 open access journals from 133 countries and more than 4.6 million open access articles covering all areas of science, technology, medicine, social science and humanities. All Atlantis Press journals are indexed in DOAJ.

### Ei Compendex

Elsevier's *Ei Compendex* (Engineering Index - COMPuterized ENgineering INDEX) on *Engineering Village* is the broadest and most complete engineering literature database in the world. It provides a holistic and global view of peer-reviewed and indexed publications with over 20 million records from 77 countries across 190 engineering disciplines. A select number of Atlantis Press journals (i.e. within relevant subject areas) is indexed in Ei Compendex.

### PubMed

*PubMed* is a free search engine which provides access to references and abstracts from biomedical and life sciences literature and which has been developed and maintained by the *National Center for Biotechnology Information* (NCBI), a division of the *U.S. National Library of Medicine* (NLM) at the *U.S. National Institutes of Health* (NIH). PubMed comprises more than 30 million citations and abstracts, primarily from *MEDLINE* but also from *PubMed Central* (PMC) and other life science journals and books, covering the fields of biomedicine and health and portions of the life sciences, behavioral sciences, chemical sciences and bioengineering. Many PubMed records also contain links to full-text articles, some of which are freely available (often in PMC). A select number of Atlantis Press journals in health and medical sciences is indexed in PubMed.

### Portico

*Portico* is a community-supported digital preservation archive that safeguards permanent access to e-journals, e-books and digital collections for researchers, scholars and students. The Portico digital preservation service is part of *ITHAKA*, a not-for-profit organization which aims to "help the academic community use digital technologies to preserve the scholarly record and to advance research and teaching in sustainable ways". The Portico archive currently contains more than 88 million journal articles, more than 1 million books and more than 4 million other digital collection items from a total number of 663 participating publishers. To comply with NLM requirements (for indexation in *MEDLINE* and *PMC*) a select number of Atlantis Press journals is preserved in the Portico archive.

### China National Knowledge Infrastructure (CNKI)

The *China National Knowledge Infrastructure* (CNKI) is a key national information construction project launched by *Tsinghua University* and supported by the PRC Ministry of Education, PRC Ministry of Science and Technology, PRC Ministry of Propaganda and the PRC General Administration of Press and Publication. It is dedicated to the mass digitization of China knowledge resources as well as creating the platform for global dissemination and value-added services (CNKI was designated as the second agent of DOIs in mainland China by the *International DOI Foundation* in 2013). It comprises the China Integrated Knowledge Resources Database which contains over 90% of China knowledge resources. Most of the Atlantis Press proceedings and journals content is indexed in CNKI.

## About Atlantis Press

Atlantis Press – now part of Springer Nature – is a global open access publisher of scientific, technical and medical (STM) content which was founded in Paris in 2006. Our mission is to support the advancement of scientific, technical and medical research by contributing to a more efficient and effective dissemination and exchange of knowledge both for the research community and society at large.

Since its inception Atlantis Press has launched and developed several book series containing more than 120 books (co-published with Springer-Nature), 17 proceedings series with over 1,200 proceedings and 20 open access journals across various STM disciplines. Currently, our content platform contains more than 140,000 published articles which are all open access (and hence freely accessible) and which generate more than 25 million downloads every year.

Besides our headquarters in Dordrecht, Atlantis Press also has offices in Paris, Hong Kong, Beijing and Zhengzhou. Over the years the company has attracted a global and experienced group of publishers from different backgrounds as well as an Advisory Board which helps to assess and attract new STM publishing projects and initiatives aimed at further developing technology for publishing digital and interactive content.

Atlantis Press' primary focus is on publishing scientific content across all STM disciplines with the aim to exploit the best available analytics and technology regarding the standardization of article metadata, semantic web applications, content metrics and open archive standards in order for scientific publications and knowledge to be more efficiently created, disseminated, located and promoted. On top of this, Atlantis Press also provides publishing services to third-party STM content owners, such as Learned Societies and Universities, as well as consultancy services within the broader STM information industry.
