Kepada: Sutarto <sutarto@iaincurup.ac.id>

Dear Dr. Sutarto,

We have reached a decision regarding your submission to Islamic Guidance and Counseling Journal (Submission Portal - New!), "Adaptation of the Cognitive and Affective Mindfulness Scale (CAMS-R) to Indonesian Version and Its Validation: Muslim Mothers-Data Driven".

Our decision is to **Accept** your Submission for Publication in Islamic Guidance and Counseling Journal.

Before preparation of the proofs, the manuscript will undergo copy-editing to align it with the journal's editorial standards. You will be contacted by the editorial team should any questions arise.

From now on, any request for substantial changes in content (changes of title and authorship, new results and corrected values, changes in figures and tables) will be subject to a completely new peer-review process.

I have also attached our reviewer request. It is not mandatory but highly recommended.

Thank you for considering the Islamic Guidance and Counseling Journal for the publication of your paper.

Best regards,

Aprezo Pardodi Maba

Reviewer D:

This research aimed to conduct linguistic adaptation of CAMS-R by translating it into Indonesian. Also, it aimed to examine the measurement model to find whether the structure of CAMS-R was confirmed relevant to empirical data. It is extremely relevant to provide locally informed data, and authors should be commended for their contribution. The report is very well-written. But unfortunately, I don't see the most important part of it, that is to say, the data itself. Can authors also provide the raw unprocessed (original) dataset so that it can be reused by other authors? This would much improve the meaning and the quality of the present work, attracting more interest and citations. Sharing open data is, indeed, a major revolution of science in the last years.

Recommendation: Accept Submission
